

FSLogix Apps Agent Installation

Supported Windows Environments

All windows environments newer than & including Windows 7 / Server 2008 R2.

The Agent is installed by running the `FSLogixAppsSetup.exe` program (32 or 64-bit depending on your platform).

1. Enter your product key into the field provided.

If a key is not provided a trial period is automatically started and lasts for 30 days. Once this period has ended the [driver \(frxdrv.sys\)](#) and [service \(frxsvc.exe\)](#) will no longer start. To apply a key after the Agent is installed see [frx.exe](#).

2. You must agree to the license terms and check the box to enable the Install button.

To change the location where the Agent files are installed, click Options.

 The default installation location is `C:\Program Files\FSLogix\Apps`.

Office365: Required Deadlock Patch for Windows 7 & 2008 R2

The following patch from Microsoft **must** be applied in order for the FSLogix Office 365 Container product to work properly: <https://support.microsoft.com/en-us/kb/2614892>
